**Address:** Hercules Avenue 1243, Hercules 94547, United States **Phone number:** 15104177347

**Email address:** webdevshekhar@gmail.com **Web:** <https://www.linkedin.com/in/shekhar-chaudhary-b5a759148/>

## PROFILE

**UI Developer/React Js Developer** with **more than 5+ years of experience**. I started as a QA and passionately transitioned to FrontEnd developer. I am specialized in frontend development specially in **React/Redux and TypeScript**. Highly skilled and hands-on experience in implementing highly-responsive user interface components by using React concept. I hold Advance programming certifications and i am also SRUM certified. I have used extensively **React/Redux/TypeScript/Saga** in my current position. Proven background in **lean startup, project management** and **customer relations**. I am currently working for AllState as React Developer. **Authorized to work in US for any employer.**

## WORK EXPERIENCE

### **React.js Developer/UI Developer AllState/Avail**

06/2019 - present    SAN FRANCISCO, UNITED STATES

#### **Responsibilities :-**

- Worked in Agile (Hybrid) Environment
- Translated designs and wireframes into high-quality code.
- Actively participated in the decision-making process of the team ensuring that the simplest appropriate technology and design is chosen to meet user needs.
- Leads and participated in daily site, cross-site, and product team standups.
- Provided input into the architecture and design of the product; collaborating with the team in solving problems the right way.
- Wrote optimized, secure, and scalable code
- Served as an expert on a specific business domain and demonstrated leadership and accountability on client facing technology stack.
- Practiced daily paired programming and test-driven development in writing software and building products using React.js, Typescript, Redux, Saga, Jest and React testing library.
- Used Rect hooks for the core business functionality.
- Configured Cypress framework for end to end Ui testing.
- Coached more junior team members around different technologies.
- Participated in knowledge sharing, and contributes to the overall growth of the collective knowledge of the team.
- Experienced on approaches and tools for automated testing and monitoring A/B Testing.
- Actively participated and gave required input on ARB ( Architect Review Board) meetings.
- Involved in architecture roadmaps.
- Work with development teams to identify end-to-end test scenarios and build them into automation
- Contributed to story planning and estimation
- Implemented Web Accessibility across the web application.

### **React developer/UI developer Zennify**

10/2017 - 06/2019    SACRAMENTO, CA, UNITED STATES

- Designing, developing and testing the web application by using the HTML5,

## WORK EXPERIENCE

CSS3, React JS and Redux.

- Setup React environment by creating Webpack, Babel, Npm and JEST for Unit Testing.
- Involved in responsive design and developed responsive web application that could be served to desktop, Tablets and mobile users using React JS.
- Responsible for creating React Reusable Components, Containers, Forms, Events, Keys, Router, Animations and Flux concept.
- Used standard CSS naming convention called BEM (Block, Element, MODIFIER) for clear understanding of classes.
- Worked on CSS pre processor SASS AND LESS.
- Developed image Drag and Drop functionality using React-Draggable for Profile creation.
- Created and used Reducers that received said Actions to modify the Store State Tree.
- Maintained states in the stores and dispatched the actions using redux. Worked extensively using ES6.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- Responsible for optimizing animation logic with optimistic functions to increase performance in rendering.
- Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls.
- Used Restful web services to call for POST, PUT, and DELETE and GET methods
- Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application.
- Used Git for version controlling and regularly pushed the code to GitHub.
- Used Asana for Project Management tool and also for bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Worked on INVISION for all Mockups.

### Front End Developer Vintrex.inc

01/2017 - 09/2018 SAN LEANDRO, CA, UNITED STATES

Bay cities produce is online ordering web platform, where registered customer can order the produce item online very efficiently and easily without and hassle. Since the company was implementing new application, I was involved from the beginning of the web app development. My role in this project was design and develop the application which was totally based on business requirement. Extensively used React.

- Involved in complete Software Development Life Cycle - Designing, Coding, Testing, Debugging, and Production support for the project.
- Participated with end users and business analyst to understand the business requirements.
- Designed the front-end applications, user interactive (UI) web pages using web technologies like HTML5, CSS3, JavaScript, jQuery, React JS and Ajax.
- Involved in developed React JS pages, Web services calls and AJAX calls for the application
- Used React JS in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope.
- CSS styles were developed to preserve the uniformity of all the screens throughout the application and positioning of screen objects.
- Help in implementing MVVM architecture using Redux Architecture with React JS.
- Responsible for design and development of web pages. Worked on Front end by using JavaScript.
- Developed user interface by using the React JS, Redux.
- Worked in using React JS components, Forms, Events, Keys, Router, Animations and Redux concept.
- Develop various screens for the front end using React JS and used various

## WORK EXPERIENCE

predefined components from NPM (Node Package Manager) and Redux libraries.

- Build React components and functions to be used in different pages.
- Responsible for developing a front-end application using React JS and Redux architecture for internal team's productivity use.
- Involved in React JS and working with React Redux architecture. Worked with React Router for developing Single Page Application.
- Worked on responsive design and developed responsive website that could be served to desktop, Tablets and mobile users using React.js.
- Implemented the Drag and Drop functionality using React-Draggable.
- Implemented the Grid and Cell functionality using React-MDL. Thoroughly performed unit testing and integration testing.

### **Jr. Front End Developer (intern)** **RapidWeb**

09/2015 - 05/2016    BERKELEY, CA, UNITED STATES

- Developed user interface using HTML5, CSS3, JSON, JavaScript, jQuery, and jQuery UI
- Used JQUERY to handle the client-side validations.
- Responsible for transforming designed mock-ups to web pages.
- Used to update the HTML pages using JQUERY AJAX via JSON response.
- Designed web pages and used applications that meet business needs and user goals through a user experience.
- Developed Web applications that are cross - browser compatible.
- Optimized, and created new sprites with Photoshop to generate CSS3- based elements.
- Creating browser compatibility web pages using HTML5, CSS3, JavaScript, jQuery and AngularJs.
- Performed Latest Web Technologies, Usability, Accessibility, and User Experience.
- Worked closely with team members to meet the client requirement.
- Actively participated in day-to-day meeting, status meeting, strong reporting and effective communication with project manager.

### **IT intern (TA)** **Berkeley City College**

10/2014 - 08/2015    BERKELEY, CA, UNITED STATES

As IT technical intern and teacher assistance, my responsibility was to tutor other student about the new web technologies like HTML5, CSS3, JAVA and JavaScript. I have helped student how to built their own personal websites, moreover help them better understanding of wire framing, design pattern and how to add on JavaScript frameworks like React.js/JQuery to their website, so that their website is more responsive and dynamic.

### **jr.From End / QA** **Books4groups.LLC**

06/2013 - 07/2014    CHICAGO, IL, UNITED STATES

- Developed the front-end design & development of HTML pages.
- Integrated HTML into WordPress & CMS platforms by primarily converting them into themes and templates.
- Responsible for the implementation of Web Design based on CSS, HTML5, and Bootstrap Front-End Framework.
- Developed WordPress plugins and modules to embed into the active pages using PHP.
- Successfully performed the RESTful APIs Integration using XML and JSON.
- Created new websites in WordPress CMS and also restructured the existing ones by customizing the templates using Dreamweaver.
- Modified widgets and plug-ins to stream live data from the social networking sites.

## WORK EXPERIENCE

- Conducted full functional tests, link tests and the browser compatibility tests for the websites.
- Implemented the SEO Techniques to improve the search results on the web.
- Streamlined the Responsive Web Design to enhance the Mobile User Experience and developed designs for the prototypes for the Mobile UI.
- Conducted extensive tests and analyzed the current version of the Mobile Application and developed a new version based on the feedback.
